We are transmitting herewith the following attached items and information (as indicated with an "X"):

☒ **Amendment and Response Under 37 CFR §1.312 (9 pgs.).**

Based upon our earlier telephone conversation regarding this case, I am attaching an Amendment to make some pre-issue language changes to this case.

Specifically, I am removing the term "processor" from several dependent claims. This change is being made to harmonize the dependents with the independents to which they depend.

Secondly, I am removing the term "timed" from several of the independent claims.

It is Applicant's understanding that neither of these changes effect the patentability of the allowed claims. Accordingly, there should be no reason why these amendments cannot be made. Please contact me to discuss this issue if you believe otherwise.
